In Mold Labeling

A excellent alternative to printing directly on the package or using pressure sensitive label products. PLS, Inc. in-mold labels are printed using flexographic printing technology to produce high quality graphics that demand the attention of consumers and improve your brand presence on shelf.

In-Mold labels are ideal for any product that is packaged in a plastic container from drink mixes, to stadium cups, to yogurt containers even cat litter containers. Power tools and 5 gallon buckets are examples of durable good products that also can benefit from in-mold labeling.

Roll fed or cut and stack, PLS, Inc. can meet your in-mold labeling needs
